

- We are delighted at another hugely successful year for Hazelwick sixth form, particularly in light of the increased demand of the new linear A Levels
- The A level pass rate was an excellent **99%**
- **79%** of A level grades were A* - C or equivalent
- **53%** of A level grades were A* - B or equivalent
- Outstandingly, over a quarter of A level grades were A* or A (**27%**)
- An amazing **17** students achieved 3 or more A*/A or equivalent, with our top attaining student gaining a stunning **A* A* A***, and another student gained **A* A* A**
- An impressive total of **94** students (**63%**) scored at least one A*/A or equivalent
- One of our top-achieving students has gained a place at Oxford University to read chemistry
- Three students have been accepted for Medicine; one at University College London, one at St. Georges University of London and another at University of Southampton
- We are very optimistic that, with these excellent results, the vast majority will be able to progress to their university of choice
- These fine results are the reward for two years of dedication and hard work from students and teachers alike – our students have once again risen to the challenge admirably!
- We are not only proud of our sixth formers' academic success, but also immensely grateful for the enormous contribution they have made to the wider life of the school community
