

Year 7: ASK Yourself!

Subject: Design and Technology

Unit: My Beautiful Book Project

	Launching 1-2	Developing 3-4	Progressing 5-6	Mastering 7-9
S kills				
Communication	I need to work on my grammar and spelling. My drawings are basic but neat.	My work is neat and all pages clear and easy to understand with care shown.	Also my drawings are clear and good quality and my grammar and spelling is accurate.	I use skilful drawings and good use of language to communicate my story beautifully.
Craftsmanship	My circuit and book need further work if they are to function properly for their intended.	My circuit and book content is finished well with only minor defects or rough/unfinished parts.	My circuit and book pages are of good quality, finished well throughout and show no defects.	"My Beautiful Book" practical work is finished to the highest quality and could easily be sold in a retail store.
Homework	My homework varies from week to week and I score a range of marks for it.	My homework is of consistently good quality but I don't always score 10/10.	My homework is always of excellent quality and I always get 10/10.	My homework is always perfectly done and I go above what is asked of me.
K nowledge				
Electricity	I am learning about electricity and understand what it does in my product.	I understand electricity and the basics of what it is and where it comes from.	I know how electricity works and how it can be created and used in products.	I show a good understanding of the physics of electricity including atomic structures.
Manufacture	I am learning the materials and processes used in DT but do still need reminding.	I know most of the materials and processes used and I mention these in written work.	I know and use all specific material and processes names in my written work.	I know, can name and understand all the processes and materials I have used in DT.
Health and Safety	I am learning the health and safety rules but sometimes need to be reminded.	I understand and follow good health and safety practice while in the DT department.	I always use machines in a safe way without needing assistance or reminding.	I am able to set up and use a variety of machines in a way which is safe for myself and others.
